

What's changing in your area?

WINTER 2009

GLASGOW COMMUNITY
HEALTH AND WELLBEING
RESEARCH AND LEARNING
PROGRAMME

GOVAN

Welcome to the latest edition of the Govan GoWell newsletter. You may remember receiving our last newsletter earlier this year in which we told you about general progress for the GoWell programme and what we had planned for this year. This newsletter outlines what residents told us has changed about living in your neighbourhood since 2006.

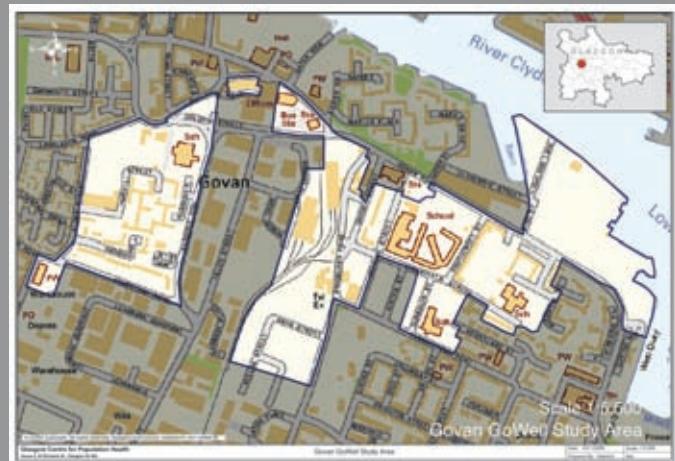

For those of you who are unfamiliar with GoWell, it is a ten year programme looking at the impacts of housing and neighbourhood regeneration on the health and wellbeing of communities. One of the ways we do this is through our survey of residents.

Our first survey was in 2006 and we have already circulated newsletters with the findings from that. We completed our second survey in August 2008 and we are planning to carry out another two in 2011 and 2013. Over time this will give us a picture of how regeneration is affecting residents like yourself. What are the important changes? Have things got better or worse – and for whom? These findings will be used to help planners improve services and regeneration in your area and elsewhere in the future.

Many of you who read this may have taken part in one or both of our surveys. To those of you who did take part, once again we thank you very much for your time.

Since our last newsletter we have been comparing what residents told us in our most recent survey in 2008 with what they told us back in 2006. We are pleased to provide you with a summary of this. As you will see, some issues have remained much the same, some have improved, while others have got worse. We hope they will be of interest to you.

WHO'S INCLUDED?

© Crown Copyright. All rights reserved. Glasgow City Council, 100023379, 2009.

There are 15 different areas in Glasgow included in our study – one of which is Govan.

In Govan, the GoWell study includes two areas of housing separated by the shopping centre and carpark as shown on the map.

KEY FINDINGS

188 Govan residents took part in the first survey in 2006 and 255 took part in the second one in 2008.

- Most people say they are satisfied with their **homes** (89% in 2008) and the proportion 'very satisfied' increased from 30% in 2006 to 34% in 2008.
- Most people are also satisfied with the **neighbourhood** as a place to live – 80% in 2008. Again there is an increase in the proportion saying they are 'very satisfied' with the neighbourhood from 10% in 2006 to 20% in 2008.
- Some of the **public services and amenities** in and around the neighbourhood are seen to have got better. For example, the number of people who rated childcare or nurseries as 'good' increased from 65% in 2006 to 73% in 2008; and ratings for parks/open spaces rose from 52% in 2006 to 57% in 2008.
- However, others are seen to have got worse, for example, only 50% of people rated youth and leisure services as good in 2008 compared to 63% in 2006; and ratings for policing fell from 57% in 2006 to 42% in 2008.
- We asked some questions about whether **anti-social behaviour** issues were a problem in Govan. The three most 'serious' problems in Govan are considered to be: people being drunk or rowdy in public places; people using or dealing drugs; and vandalism, graffiti, or other deliberate damage to property/vehicles.
- Feelings of **safety** at night-time have declined. In 2006, 16% of people said they either felt unsafe or never walk alone after dark but this had risen to 41% of people feeling this way in 2008.

- When asked whether they felt the **reputation** of Govan had changed over the past two years: the majority of people (72%) felt it had stayed the same; 13% felt it had got better; while 15% felt it had got worse.
- There is a strong **sense of belonging** in Govan, with 83% of people feeling they belong to the neighbourhood in 2008. This is an increase from 74% in 2006.
- Many more people feel that **people from different backgrounds** in the area get on well together. This increased from 78% in 2006 to 93% in 2008.
- More people feel like they can **have a say in decisions** that affect them. For example, the number of people who feel their landlord or factor takes account of residents' views when making decisions increased from 55% in 2006 to 61% in 2008. Many more people also feel that either on their own or with others they can **influence decisions** affecting the local area – from 31% in 2006 to 56% in 2008.
- The number of people **smoking** appears to be falling slightly with 49% of people saying they smoke in 2008, compared to 51% in 2006.
- **Self-reported health** is fairly high and has improved slightly with 75% of people saying their health is excellent or good in 2008. This figure was 72% in 2006.

WHAT NEXT:

**All the personal information we collect is completely confidential and anonymous
and is not shared with anyone outside the research team.**

Over the coming year we will send you a series of newsletters, each of which will focus on a particular issue and provide you with the survey responses for that issue in more detail.

In addition to sharing the survey findings with you and your neighbours through this newsletter, we're offering presentations to local stakeholders and service providers such as local housing organisations, community planning partnerships, and community health and care partnerships. If you belong to a community group that would be interested in hearing a presentation and discussion of the findings for Govan please contact Jennie Coyle on the details below.
