

# What's changing in your area?

WINTER 2009

GLASGOW COMMUNITY  
HEALTH AND WELLBEING  
RESEARCH AND LEARNING  
PROGRAMME

## Sighthill

Welcome to the latest edition of the Sighthill GoWell newsletter. You may remember receiving our last newsletter earlier this year in which we told you about general progress for the GoWell programme and what we had planned for this year.

For those of you who are unfamiliar with GoWell, it is a ten year programme looking at the impacts of housing and neighbourhood regeneration on the health and wellbeing of communities. One of the ways we do this is through our survey of residents. Our first survey was in 2006 and we have already circulated newsletters with the findings from that. We completed our second survey in August 2008 and we are planning to carry out another two in 2011 and 2013. Over time this will give us a picture of how regeneration is affecting residents like yourself. What are the important changes? Have things got better or worse – and for whom?

These findings will be used to help planners improve services and regeneration in your area and elsewhere in the future.

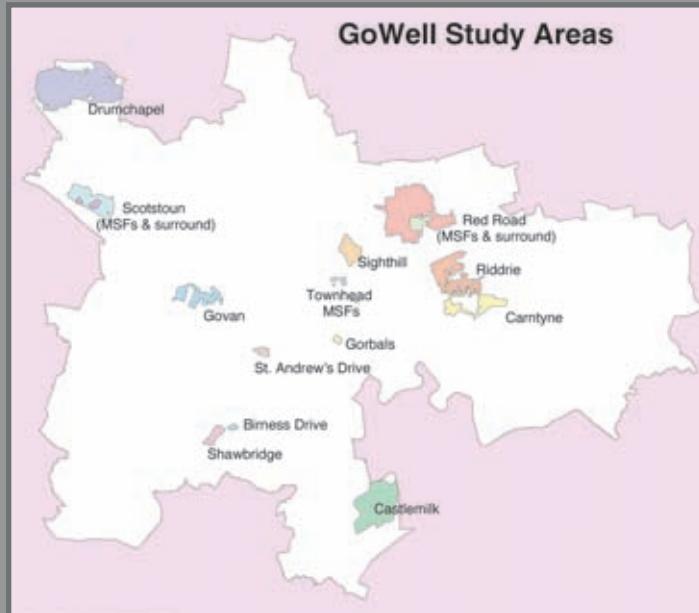

Many of you who read this may have taken part in one or both of our surveys. To those of you who did take part, once again we thank you very much for your time.

You live in one of the areas of Glasgow that is experiencing some of the biggest changes – so **we are especially interested in hearing from you and your neighbours in Sighthill**. In our future surveys we'd like to revisit as many of you as possible who have already taken part in GoWell. That includes people who remain in Sighthill and the people who move on. Wherever you are, we'd like to understand how things have changed for you over time and whether the regeneration of Sighthill has affected you.

For this reason we have included a contact details postcard and we would greatly appreciate it if you could complete and return this freepost card. **We will enter your returned card into a prize draw** for the chance to win first prize of £150, second prize of £50 or third prize of £30 in supermarket vouchers.

Since our last newsletter we have been comparing what residents told us in our most recent survey in 2008 with what they told us back in 2006. We are pleased to provide you with a summary of this. As you will see, some issues have remained much the same, some have improved, while others have got worse. We hope they will be of interest to you.

### WHO'S INCLUDED?

© Crown Copyright. All rights reserved. Glasgow City Council, 100023379, 2009.

There are 15 different areas in Glasgow included in our study – one of which is Sighthill, as shown on the map.

## KEY FINDINGS

672 residents took part in the first survey in 2006 and 478 took part in the second survey in 2008. Below is a summary of some of the things they told us about living in Sighthill.

- Overall housing satisfaction has fallen from 63% of people saying they are satisfied with their home in 2008, compared to 71% of people in 2006.
- Satisfaction with the **neighbourhood** has also fallen with 57% of people saying they are satisfied with the neighbourhood as a place to live in 2008, compared to 73% of people in 2006.
- More positively, many local **public services and amenities** are seen to have got better. Most notably, the number of people who rated parks/open spaces as 'good' increased from 38% in 2006 to 58% in 2008; ratings for children's play areas rose from 28% in 2006 to 57% in 2008; and ratings for childcare/nurseries rose from 49% in 2006 to 60% in 2008.
- We asked some questions about whether **anti-social behaviour** problems are an issue in Sighthill. Over a third of people said that people using or dealing drugs; people being drunk or rowdy in public places; teenagers hanging around; and vandalism, graffiti, or other deliberate damage to property/vehicles are a 'serious problem' in Sighthill.
- When asked whether they felt the **reputation** of Sighthill had changed over the past two years, the majority (51%)

felt it had stayed the same, 17% felt it had got better, while 32% felt it had got worse.

- Feelings of **safety** at night-time have declined. In 2006, 17% of people said they either felt very unsafe or never walk alone after dark but this had risen to 52% of people feeling this way in 2008.
- Most people said that **people from different backgrounds** in the area get on well together and this has increased from 69% in 2006 to 82% in 2008.
- Although still quite low, more people feel like they can **have a say in decisions** that affect them. For example, the number of people who feel their landlord or factor takes account of residents' views when making decisions increased from 40% in 2006 to 49% in 2008. More people also say that either on their own or with others they can **influence decisions** affecting the local area – from 20% in 2006 to 34% in 2008.
- Rates of **smoking** have fallen from 30% of people saying they are a smoker in 2008 compared to 37% of people in 2006.
- **Self-reported health** is high and has remained the same with 84% of people in both 2006 and 2008 saying their health is excellent or good.

## WHAT NEXT:

Over the coming year we will send you a series of newsletters, each of which will focus on a particular issue and provide you with the survey responses for that issue in more detail.

In addition to sharing the survey findings with you and your neighbours through this newsletter, we're offering presentations to local stakeholders and service providers such as local housing organisations, community planning partnerships, and community health and care partnerships. If you belong to a community group that would be interested in hearing a presentation and discussion of the findings for Sighthill please contact Jennie Coyle on the details below.

***All the personal information we collect is completely confidential and anonymous  
and is not shared with anyone outside the research team.***
