

Wider Red Road

At-a-glance summary

2006-2015

We have conducted four repeat resident surveys in Wider Red Road over our ten-year study: the first in 2006 in which 1,087 residents took part; the second in 2008 in which 837 residents took part; the third in 2011 in which 809 residents took part; and the last survey in 2015 in which 691 residents were interviewed. These surveys included a whole range of questions about how people feel about their homes, their neighbourhood, services in the area, their lifestyle and circumstances and their health and wellbeing.

Over time, this has helped us understand more about the process of neighbourhood regeneration, and to highlight what is working well for communities and what needs more attention.

A selection of the findings for Wider Red Road from the four surveys is summarised below.
